National Competence Network
for Children as Next of Kin

CHILDREN AND SIBLINGS

- needs information and follow-up care

1 Does the patient have children or siblings under the age of 18?

- Register personal information about the children
- Register the patient's relationship with the children
- Register relationships important to the children

2 Are the children taken care of when the patient receives treatment?

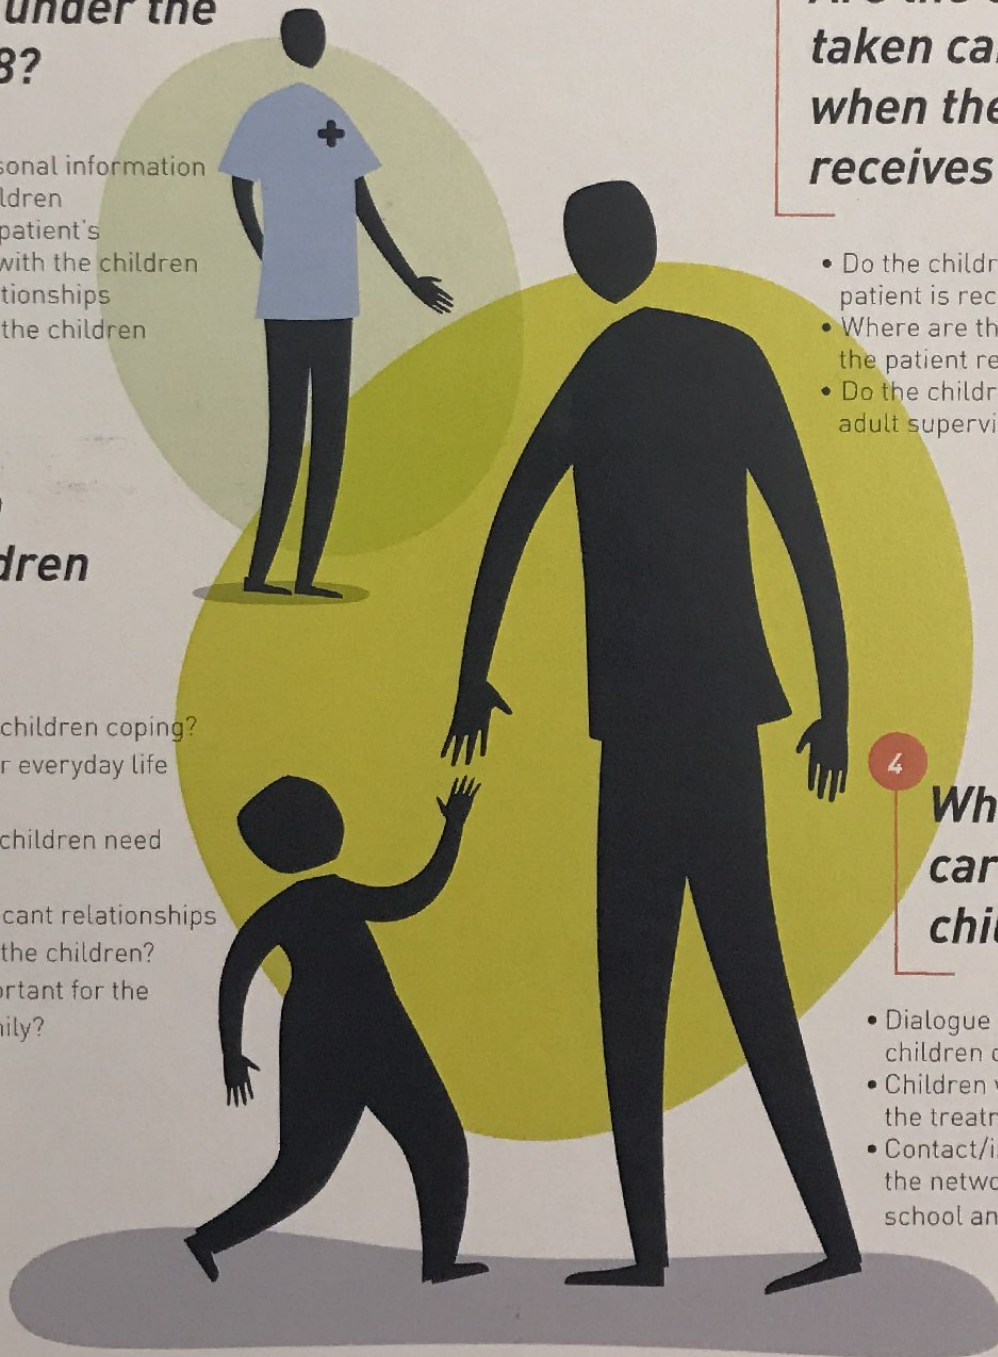

- Do the children know that the patient is receiving treatment?
- Where are the children when the patient receives treatment?
- Do the children have proper adult supervision?

3 What do the children need?

- How are the children coping?
- How are their everyday life affected?
- What do the children need to know?
- Which significant relationships can support the children?
- What is important for the children/family?

4 What follow-up care do the children receive?

- Dialogue meetings with patient, children or family
- Children visiting the patient at the treatment facility
- Contact/information flow to the networks i.e. kindergarten/school and other support agencies
